WORK IN AKRON STREET RIGHTS-OF-WAY¹**

Page 2 of 2

<u>Item</u>	<u>Unit Price</u>	<u>Remarks</u>
Lawn Restoration	\$130.00 mobilization per location plus \$13.00 per square yard.	
Tree and Planting Restoration	Price determined on a case by case basis by the City.	Compensation may be required for tree damage. See footnotes 2 and 3 below.
Tree Grate Removal	\$200.00 per grate	
Tree Grate Installation	\$200.00 per grate	
Signing Removal or Restoration, Striping or Marking Restoration	Proposed price will be included in review comments. Only the City's Traffic Engineering Division is authorized to restore striping and other markings.	Determined on a case by case basis by the Traffic Engineering Division.
Conduits, Wires, Pull Boxes, Loops, etc.	The prices will include labor, materials, equipment, and administrative expenses.	Determined on a case by case basis by the Traffic Engineering Division.

¹If wanted, request the above work items on your permit application. The City will advise if they have the resources to do the requested work as part of the application review comments. The permittee is responsible for all work the City does not agree to do in the review comments. The City will invoice the permittee for completed work at the completion of the work.

²Severely damaged or destroyed trees shall be appraised by the City Arborist and Horticulturist using industry standards of replacement costs, or the formula in the most recent edition of the Council of Tree and Landscape Appraisers. Measurement of trees 4" or less in trunk diameter shall be measured at 6" above ground level, trees over 4" and up to 6" trunk diameter shall be measured at 12" above the ground, and trees over 6" trunk diameter shall be measured at 4.5 DBH (diameter at breast height). When appraisals exceed the installed cost of a 2.5" tree, the quantity shall be increased by dividing the appraisal amount by the 2.5" tree replacement cost. For example, compensation for a 6" tree, which costs \$1,500 to replace, would require four 2.5" trees. Replacement trees may be planted at an alternate location determined by the City Arborist and Horticulturist.

³Trees damaged, but not warranting removal shall be appraised by the City Arborist and Horticulturist using industry standards. Damage which will result in premature death of the tree, or which is unable to be rectified by pruning, tracing wounds, etc., shall be compensated for by planting a tree(s) at a location designated by the City Arborist and Horticulturist.

The City can provide work in Akron street rights-of-way only. The permittee is responsible for all work outside street rights-of-way.
